About Me

Entry Level Programmer with experience utilizing C# , C++ and Python to develop software and debug existing code. Passionate about learning new coding languages and honing existing skills.

Projects

Graduation Project Mobile Reviews Analysis

A web application that scraps phone reviews from different sources and uses Sentiment analysis and Text summerization models to evaulate the mobile phones from users prespective

- Implemented a sentiment analysis model to classify user reviews
- Worked with real-world, noisy text data scraped from the web, learning how to clean and preprocess unstructured text.
- Gained practical experience with Natural Language Processing (NLP) techniques

Education

Comptuer Information Systems Ain Shams University, Expected graduation June 2025

Skills

- Computer skills
- Problem solving
- Active listening
- Critical thinking
- Teamwork and collaboration
- Time management
